- **Always-on** with auto-reconnect
- Select out of **100+ servers** in 55+ countries (US/EU/Asia)
- **Static IP**
- Advanced features for port-forwarding
- Split Routing
- **No change to your existing office network** set-up, just connect on an available port

## Benefits

- **Unlimited number** of users in the office
- **Significantly cheaper** than signing up individual VPN plans for your employees
- **Solve connection issues** to overseas mail-servers and business platforms
- Securely **access Cloud services**
- Easy connection: just turn on your Wi-Fi or connect on the LAN cable
- Works on **all devices**
- **Mobile accounts included** for nomadic users and staff on the road

# Specifications

## VPN Connection

VPN Network	Astrill (100+ servers in 50+ countries)
VPN Protocols	OpenVPN/SSL, L2TP/ IPsec, Cisco IPsec, PPTP
Concurrent connections	Unlimited VPN users in office
Nomadic users	10 mobile accounts
VPN Management	<ul style="list-style-type: none"> <li>User friendly GUI to select servers</li> <li>DMZ and Port-forwarding options</li> <li>Automatic Reconnect</li> </ul>
Filters	Site Filters: 3 supported modes: <ul style="list-style-type: none"> <li>Tunnel all web sites through VPN</li> <li>Tunnel only specific sites</li> <li>Tunnel only International sites</li> </ul> Device Filter: select which devices you want to tunnel through VPN

## Wireless LAN

Standard Compliance	IEEE802.11n, IEEE802.11g, IEEE802.11b
Security	WPA2-PSK (AES,TKIP), WPA-PSK (AES, TKIP), 128/64-bit WEP
Transmission Method	Direct Sequence Spread Spectrum (DSSS), OFDM, MIMO

## Wired LAN

Standard Compliance	IEEE802.3, IEEE802.3u, IEEE802.3ab
Speed	10/100/1000 Mbps (Auto Sensing)
Number of LAN Ports	4 x RJ-45 (Auto MDIX)
Number of WAN Ports	1 x RJ-45 (Auto MDIX)

## Other

Power Consumption	14W (Maximum)
Dimensions	165 x 158 x 30 mm
Weight	382 g
Power Supply	External AC 100-240V Universal, 50/60Hz

## Complementing VPN solutions

As your business grows, it might expand to multiple shops or offices across the country and around the world. To keep things running efficiently, your people working in those locations need a fast, secure and reliable way to share information across computer networks & resources.

### Remote-access VPNs

Allowing employees to establish secure connections with the office, anytime, anywhere, with almost any device. Extending almost any data, voice, or video application to the remote desktop and access resources as if they were directly plugged in to the enterprise's servers.

### Site-to-Site VPN Connection

Internet-based WAN infrastructure to extend network resources to branch offices, home offices, and business partner sites. All traffic between sites is encrypted and integrates network features such as routing and quality of service management.
